## Comtech Telecommunications Corp. Receives \$1.2 Million Satellite Ground Station Equipment Order

MELVILLE, N.Y., April 14, 2011 (GLOBE NEWSWIRE) -- Comtech Telecommunications Corp. (Nasdaq:CMTL) announced today that its Tempe, Arizona-based subsidiary, Comtech EF Data Corp., received a \$1.2 million order for satellite ground station communications equipment. The order was from a systems integrator and will be used by a Latin American country as part of their military network.

The military end-customer specified that they required Comtech's CDM-625 Advanced Satellite Modems and LPOD Block Up Converters. The CDM-625 Advanced Satellite Modem combines advanced forward error correction with revolutionary DoubleTalk® Carrier-in-Carrier® bandwidth compression, allowing for maximum savings under all conditions. The combination of advanced technologies in the CDM-625 enables multi-dimensional optimization. Comtech's LPOD Block Up Converter eliminates the traditional requirement for the modem to supply a DC power source and a 10 MHz reference to the Block Up Converters and Low Noise Block Converters.

"This order demonstrates the continued reliance on our products by foreign military customers who acknowledge our best in class products by deploying them to support mission-critical communications," said Fred Kornberg, President and Chief Executive Officer of Comtech Telecommunications Corp.

Comtech EF Data Corp. manufactures a broad spectrum of satellite earth station communications products, including Satellite Modems, Bandwidth & Capacity Management, TCP/IP Performance Enhancement Proxies, Encapsulators, Receivers, Frequency Converters, Amplifiers, Transceivers and Terminals. All products meet or exceed the standards published by worldwide and regional satellite networks. Please visit [www.comtecheftel.com](http://www.comtecheftel.com) for more information.

Comtech Telecommunications Corp. designs, develops, produces and markets innovative products, systems and services for advanced communications solutions. The Company believes many of its solutions play a vital role in providing or enhancing communication capabilities when terrestrial communications infrastructure is unavailable, inefficient or too expensive. The Company conducts business through three complementary segments: telecommunications transmission, mobile data communications and RF microwave amplifiers. The Company sells products to a diverse customer base in the global commercial and government communications markets. The Company believes it is a market leader in the market segments that it serves.

Certain information in this press release contains statements that are forward-looking in nature and involve certain significant risks and uncertainties. Actual results could differ materially from such forward-looking information. The Company's Securities and Exchange Commission filings identify many such risks and uncertainties. Any forward-looking information in this press release is qualified in its entirety by the risks and uncertainties described in such Securities and Exchange Commission filings.
