TeleCommunication Systems Awarded Contract by Sypris Electronics, LLC for Customized Cyber Training Curriculum

Cyber Security Curriculum Laboratory Addresses Global Enterprise and Critical Infrastructure Protection

Note: Comtech Acquired TCS on 2/23/2016

ANNAPOLIS, Md., Aug. 12, 2014 /PRNewswire/ -- TeleCommunication Systems, Inc. (TCS) (Nasdaq: TSYS), a world leader in highly reliable and secure mobile communication technology, today announced a contract awarded by Sypris Electronics, LLC, a subsidiary of Sypris Solutions, Inc. (Nasdaq: SYPR), to create a 15-course customized cyber security training program to be integrated into the Sypris Cyber Range™. The Sypris-TCS partnership brings TCS' world class cyber training into Sypris' simulation-based training and modeling platform that enables a safe, realistic hands-on environment for participants to hone their individual skills and teamwork in countering cyber-attacks. The initial series of classes is scheduled to launch in Asia Pacific this month.

News Facts:

- 1 Enterprises in Asia Pacific are expected to spend nearly \$230 billion in 2014 to deal with issues caused by malware, according to a study conducted by IDC and the National University of Singapore.
- 1 TCS' proven curriculum for cyber professionals encompasses a diverse learning environment that includes focused training for the protection of enterprise networks and critical infrastructure.
- 1 The Sypris Cyber Range provides the critical platform required for organizations to simulate today's increasingly complex cyber threats, allowing customers to seamlessly integrate and continuously upgrade best of breed capability and training curricula from world-class partners to make certain that they stay ahead of their cyber adversaries.

Sypris Electronics President John Walsh stated: "Sypris is pleased to announce a strategic partnership with TCS to deliver the next generation cyber security training solution. On our Cyber Range, cyber defenders hone their individual skills and teamwork to defend against cyber adversaries. Customers view our team-oriented training, in a realistic, simulated environment as a differentiator that provides unique value to them for improving their incident response and cyber resiliency."

TCS Senior Vice President and Chief Technology Officer Drew Morin stated: "TCS and Sypris are joining forces to provide customers with the integrated Sypris Cyber Range solution at a time when we are seeing an increase in threats globally. Through this solution's state-of-the-art platform, TCS is delivering an expansion of our advanced cyber training, specifically designed to fortify customers' defense against cyber-attacks."

TCS' Cyber Intelligence Group helps harden high-value entities, systems and networks against cyber threats by implementing information assurance best practices, performing vulnerability assessments and investigating cyber malicious activity. TCS also provides focused Art of Exploitation® training and customized curriculum in the fields of penetration testing, forensics, defense strategies, vulnerability analysis and reverse engineering in a state-of-the-art training facility or at customer locations around the world. TCS brings together many of the brightest minds in cybersecurity as a resource for research, collaboration and development of best-in-class technologies to protect critical networks.
