Comtech Telecommunications Corp. Announces Award for Canadian Power Company Digital Troposcatter Communication System

Melville, New York - March 23, 1998 - Comtech Telecommunications Corp. (Nasdaq: CMTL) announced today the award to its Florida operating unit, Comtech Systems, Inc. (CSI) of a contract valued in excess of \$2,400,000 from a major Canadian Power Company for the engineering, supply and installation of a digital troposcatter communications link connecting a power production facility with a major power switching site.

The system will include Comtech's state-of-the-art 2 GHz quadruple diversity digital radio, its patented digital adaptive modem, power control to eliminate interference with other communication systems and a quality performance monitor. The troposcatter communications link will provide 4 Mb/s digital capacity to carry voice and data as well as link monitoring and control information. Delivery and installation is scheduled for September 1998.

Comtech is a broad based manufacturer of state-of-the-art solid state power amplifiers and high technology satellite, microwave, and troposcatter telecommunications products and systems for commercial and government applications. For more information, Email: Info@comtechtel.com
