Comtech Telecommunications Corp. Awarded \$5.0 Million of Orders for Network Expansion Project in Asia

MELVILLE, N.Y.--(BUSINESS WIRE)-- February 23, 2015--Comtech Telecommunications Corp. (NASDAQ:CMTL) announced today that its Tempe, Arizona-based subsidiary, Comtech EF Data Corp., was awarded orders totaling \$5.0 million for SATCOM equipment and services to expand a communication network in Asia, \$3.9 million of which was received during its second quarter and \$1.1 million was received during its first quarter. Comtech EF Data's equipment was chosen as being the most efficient for the application after the customer conducted a thorough competitive analysis and various technology demonstrations.

The customer will use Comtech EF Data's CDM-570A/L-IP Satellite Modems and CDD-564A IP Demodulators to allocate dynamically bandwidth and optimize data traffic as required among many different sites. The CDM-570A/L-IP is the latest upgrade to the industry leading CDM-570 series and includes support for Comtech's [VersaFEC®](#) low latency LDPC Forward Error Correction, the revolutionary [DoubleTalk® Carrier-in-Carrier®](#) bandwidth compression, and optimized transmit filter rolloffs down to 5%, providing significant bandwidth-power savings. The modem also features intelligent header compression and a lossless payload compression engine to ensure that only essential information is transmitted across the satellite link. By leveraging the horsepower, efficiency and intelligence of Comtech's complete modem and multiplexer solution, the customer is positioned to easily add remote sites and allocate bandwidth resources when and where needed.

Dr. Stanton Sloane, President and Chief Executive Officer of Comtech Telecommunications Corp. commented on these orders, "This customer opted for our solution suite given its proven performance and dynamic capabilities, which will enable efficient allocation of satellite resources within its cost structure."

Comtech EF Data Corp. is the recognized global leader in satellite bandwidth efficiency and link optimization. The advanced communication solutions encompass the Advanced VSAT Solutions, Modems, RAN & WAN Optimization, Network & Bandwidth Management and RF products. The Company is recognized as a technology innovator, and has a reputation for exceptional product quality and reliability. The solutions enable commercial and government users to reduce OPEX/CAPEX and to increase throughput for fixed and mobile/transportable satellite-based applications. For more information, visit www.comtecheftel.com.

Comtech Telecommunications Corp. designs, develops, produces and markets innovative products, systems and services for advanced communications solutions. The Company believes many of its solutions play a vital role in providing or enhancing communication capabilities when terrestrial communications infrastructure is unavailable, inefficient or too expensive. The Company conducts business through three complementary segments: telecommunications transmission, RF microwave amplifiers and mobile data communications. The Company sells products to a diverse customer base in the global commercial and government communications markets. The Company believes it is a leader in most of the market segments that it serves.
